THAVHIWA KHULISO JOHN

SOFTWARE DEVELOPER

PROFILE

Agile .NET Software Developer with a diverse skill set spanning software engineering and technology. Possessing a strong foundation in both hardware and software, I excel at bridging the gap between systems to deliver innovative, end-to-end solutions. Passionate about building scalable, maintainable applications in fast-paced Agile environments, and continuously improving development practices through collaboration and learning.

WORK EXPERIENCE

- Techbridle Foundation** 2025 - PRESENT
Software Developer Trainee
 - Participate in daily stand-ups, sprint planning, and retrospectives while working with developers, designers, and product managers.
 - Write clean, maintainable code, debug applications, and implement unit tests to ensure software quality.
 - Work with Git/GitHub for version control and contribute to continuous integration/deployment (CI/CD) pipelines
- SERITI Institute** 2024 - 2024
Field Surveyor
 - Conduct face-to-face interviews, focus groups, and surveys with residents to gather qualitative and quantitative data.
 - Establish trust and build relationships with community members to encourage participation and obtain honest and accurate responses.
 - Accurately record responses and observations using digital devices, ensuring data integrity

PROJECTS

- FNB My App Programme** 2024 - 2025
APP DEVELOPER
 - Selected for FNB's national innovation program for aspiring developers, where I'm building a business-focused applications from scratch using modern technologies.
 - Collaborating in an Agile team to design, implement, and iterate on core features—gaining hands-on experience in product design, user research, and full-cycle software delivery.
